

5. PARKING DIAGRAM

The home has 3 parking spaces (1 garage, 2 outside). Please do not park outside of the parking diagram listed below. **Vehicles are at risk of towing if parked anywhere else.**

THE MOST IMPORTANT THING IS TO NOT PARK TO THE EAST SIDE OF THE GARAGE (LEFT WHEN YOU'RE LOOKING AT THE GARAGE) THIS IS SNOW CACHE ZONE FOR THE SNOWPLOWS OWNED BY THE COUNTY. THEY WILL TOW YOU.

Garage parking is for mid-size vehicles and smaller. We recommend having a friend help 'ground-guide' vehicles closer to the mid-size range to protect both your vehicle and the house. It is a tight fit, but most crossovers and smaller pickup trucks can fit in the garage.
